Experience:

Artemis Health Inc 2017 - Present, Sr. Software Engineer, Web Developer (Fullstack -> Devops)

At Artemis Health I was responsible for many aspects of customer facing product development. As my role changed from full stack to devops, I transitioned from feature development to an SRE and pipeline role. This included:

- Ansible development of infrastructure as code for CD on AWS (ECS)

- Maintenance of Jenkins pipeline jobs for consistent builds to validation environments

- Managing local engineer and hosted product environments

- Redundancy and security initiatives involving the end to end set of infrastructure

- Infrastructure debugging, network design, enhancing logging, monitoring and alerting solutions

- Maintaining technology and policy as we matured our HIPPA compliant and SOC2 organization and strategy (VPN, secrets management, PII access controls, logging and auditing)

- SRE roles for product uptime, scalability, releasability and extendability

Inside Sales.com 2016 - 2017, Sr. Software Engineer, Web Developer

- Working with the team creating the next generation of sales acceleration technology (ReactJS, Go, Couchbase, Docker Microservices on AWS)

- Work with 3rd party utilities to provide a clean, high performance user experience while using required underlying legacy systems

Backcountry.com 2015 - 2016 Software Engineer, Web Developer

- Responsible for the completion of an internal re-platform project (near term) - Responsible for front end development of primary retail sites and mobile

- Performance audits and updates

- Codebase architecture for new and existing api's, sites, and mobile apps - Leading performance and optimization discussions

- Dev Ops and continuous integration maintenance

Risklens (formerly CXOWARE) 2012 - 2015 Software Engineer, Web Developer

Responsible for complete development cycle of startup's new and existing SaaS product lines (expanded from 1 to 4 products) targeted at enterprise risk management. Tasks included:

- Performance audits and updates

- Security audits and updates

- Database design, strategy, implementation and maintenance

- Codebase architecture, project and team setup and management

- Dev Ops administration, setup, control, maintenance of source control, bug tracking and continuous integration systems

Washington State Digital Archives 2010 - 2011 Extended Internship

- Provided programming and debugging support for lead developers for the Secretary of State Digital Archives division.

- SQL Programming to enhance performance

Education:

Eastern Washington University 2008 – 2012 BS in Computer Science Information Systems Advanced coursework in Network Security

Continuing Education and Conferences:

Delta V London - Web Performance at Scale and Performance Culture

NgConf Salt Lake City - Latest in Angular (8) / Javascript Best Practices

ConnectTech Devops and ML Track 2019 Atlanta

Technical Expertise:
Programming Languages (ordered by experience): Javascript (Angular, AngularJS, ReactJS, Typescript, NodeJS), Html5, CSS, Python, C#, MVC3, Java, C, PHP, VB

Database Languages: MySQL (RDS), Prometheus, Postgres, MS SQL, MongoDB

Systems Technologies: Ansible, Bash, AWS Administration, Nginx, Redis, Elasticsearch, Jenkins

Other: AWS ecosystem administration, Docker, Digital Ocean, Atlasssian Products, Github, Gitlab, Trello, ArcGIS, Rally

Personal Details:

Originally from Anchorage Alaska, I love the outdoors and compete regularly in distance running and rock climbing. I moved to Spokane WA in 2008 for school (4 years) and then helped start and grow Risklens (2+ years) and became their first remote employee when I decide to move to Utah in 2014 to train for competitive trail running in the mountains. I enjoy the diversity of the intermountain west both in nature and culture as other hobbies of mine include travel and foreign language learning (French, Spanish).
